

## What Does SAP Roll Out Actually Mean?

Reuse of existing implementation cycle and business process at the new location is called **SAP Roll out**.

Here we do not have to work from scratch, just go through the logos, company code, printouts, etc and check out some basic settings according to location of the implementation.

At [Apprisia](#), we generally analyze customer requirements from scratch but in roll out project only local requirements are considered.

### Know the Advantages of SAP Roll Out

- Provide high speed for new implementation
- Through SAP roll out process, we meet the given time line easily.
- Controlled Budget

**Looks awesome?** Hire Apprisia's [SAP Consulting services](#) to get best [SAP Support](#) which you desperately need. Our SAP consultants provide 24\*7 Support even on the holidays, weekends and vacations.
